American Top Tools

GoFaster evolution

New opportunities with GoFaster

Can AS/400 improve its performance without **GoFaster**? A poor or improvable performance can be quite a few and thus **GoFaster** is not always enough or the solution at all.

Most of the 2.000 **GoFaster** users in Spain have shown an interest in getting the best of their AS/400 and has encourage us to squeeze our brains to correspond this tendency.

We now have **Tuner** software licences to offer our present and past **GoFaster** customers. Tuner is a software application which its main purpose is the automated administration of the memory resources and activity levels in order to achieve the optimisation of the AS400 and System i. **Tuner** doesn't require to have **GoFaster** installed and it surely achieves its objective independently.

Tuner is a USA product and has been installed in more than 10.000 machines during the last 10 years. **Tuner** is distributed with different length temporary licences suitable to your personal computing environment.

American Top Tools has decided to put at your disposal a **Tuner's** full capacity temporary licence, so you can install it in any AS400 in your organization with the only commitment to remove the software from your installations, after three months have elapsed, were you not interested to continue enjoying its capabilities once the temporary licence had expired.

For more information please get in touch with Ricardo Lopez, Tuner Sales Agent, rlopez@att.es
