

GoFaster's Power Edition

If you are already a **GoFaster** user in your AS400, you won't probably be thinking of changing or upgrading your machine. ¿What for? With **GoFaster** you are already obtaining maximum benefit. But it could happen, by some strange occurrence, that somebody in your shop has planned a migration to the new AS400, now Power Systems. If this was the case, don't worry, there is also a **GoFaster** Power Edition.

Those new Power System models which have limited interactive by the manufacturer, can also surpass that limitation with **GoFaster**, Power Edition, and take advantage of the total new CPW power. Unlimited **GoFaster** licenses will be able to transfer their licences to the new machine as long as they are under the annual licence control program.

AS/400's market response before the economic crisis

Our politicians frequently justify internal economic distortions with the inevitable bonds with foreign markets' evolution. We come to assume this reasons, as long as we can see that Europe, USA and the World around us, in general, are suffering the same or worse situation. From our little commercial watchtower we observe the activity in different **GoFaster**'s active markets such as USA, Malaysia, India, Germany Croatia, Mexico, New Zealand, Costa Rica and many others, and we come to terms and corroborate that it is true. There is a worldwide crisis.

As/400 sales, migrations, upgrades and all other similar activity are much more scarce and studied conscientiously because AS/400 shops try to obtain maximum outcome from the investments they already have. Consequently, **GoFaster sales have rocket**, since in a normal market situation it was a very advisable choice it now becomes necessary. For the world economy studios and observers here are the facts: **GoFaster** sales have increased by a 65% in China, 47% in USA, 41% in Germany and a 38% in Spain.

GoFaster has become the safety valve that allows to obtain generous performance of our AS/400 without having to resort to enormous investments.

Keep up with GoFaster

New Version.- Version **8.05** has been released. As well has adding internal adjustments in order to adapt to new **Power** models, it is also designed to accomplish **V5R4** requirements, and therefore its installation becomes mandatory.

New prices.- Prices have been reduced overall and especially for older models. Contract terms are still 3, 6, 9, 12, 18, 24 and 36 months and now it can also be hired on a unlimited license for a very affordable price.

Multiple machine License.- Licenses over one year can be **transferable** to new machines under a specific license control system. This lets customers have access to best prices on long contract licenses without losing the chance to change their machine and holding the right to keep the same **GoFaster** license.

GoFaster's Success reasons

Some relieve that behind **GoFaster** its overwhelming welcome in the AS/400 market there is a factual power that, based on studied marketing campaigns and round-about market researches, has introduced all around the World, in thousands of AS/400 computers, its effective and practical technique, with no other help than its customers intelligence and its convincing efficiency. Examples:

An **800-7408** with a 950 CPW power and an interactive reduced to a 50 CPW can achieve with **GoFaster** an interactive of 950 (19 timers higher).

An **520-7394** with a 1000 CPW power and an interactive reduced to a 60 CPW can achieve with **GoFaster** an interactive of 1000 (17 timers higher).

Need any other reasons?
